

## **Data Protection**

### **Policy statement on the collection and use of personal data**

Every time you visit our website, the web-server collects your transmission data for the purpose of system security and for statistical purposes. The data are stored in so-called server log files. Before it is stored, every data set is anonymized by changing the IP address. Specifically, the following data is stored:

- shortened IP address
- date and method of the access
- page viewed/name of the accessed file
- version of the HTTP protocol used
- result value of the access
- data volume transferred
- the site previously visited (referrer URL)
- information about the internet browser and operating system used

None of these data include any direct personal references. Personal data such as your name, address, telephone number or e-mail address are not recorded. The storage serves internal system-related and statistical purposes for the planning and managing of our website. This includes, for example, the knowledge of how often specific content is accessed or which browser is used to view the site.

### **Web analysis**

In order to evaluate the performance of the website, we use the web analytics service "Webalizer". "Webalizer" creates overviews such as the number of hits, file / page requests, visits, etc. based on the data of the server log files. No collation of these data with other data sources, especially with personal data, takes place. We do not disclose any collected data to third parties and are not used for any other purposes. The IP numbers are recorded to answer the queries for the duration of the visit and are not retained beyond the end of the visit. The generated information are stored in Germany by the provider All Incl. (www.all-incl.com). The data are stored for a year to track the website performance and are deleted thereafter.

### **Use of cookies**

IARPotHP e.V. does not use any procedure that automatically enables subsequent identification of the user of its website and prepares the collection or use of personal data (for example, by storing so-called "cookies" on the user's hard disk).

### **SSL security technology**

This site uses the SSL (Secure Sockets Layer) security technology in order to protect the transmission of sensitive content, such as your email requests. You can recognize a secure connection if the address line of the browser changes from "http: //" to "https: //" and the lock symbol appears in your browser line. The SSL security technology ensures that the data you submit to us cannot be read by third parties.

### **Email Communication**

You have the option to get in touch with IARPotHP e. V. by email. Your request and your address data will be treated confidentially and neither stored nor forwarded to third parties without your consent. We will use your data solely to communicate with you and answer your request. Please choose under **Contact** the appropriate e-mail address for your request. You can be sure in this way that your message will reach the right person and not be forwarded. Please note that any data transmission via the internet, for example, by sending an email might be vulnerable despite our security measures. Complete protection of the data from access by third parties therefore cannot be guaranteed.

**Right of access**

You have the right at all times to be informed about the stored personal data relating to you as well as about their provenance, their recipient, and the reason for their retention. Information about the stored data will be given to you by the webmaster of IARPotHP (webmaster@iarpothp.org). In addition, you have the right to correct your data as well as to block and delete your personal data, insofar as this does not conflict with a legal requirement for retention.

The supervisory authority responsible for data protection of the IARPotHP e.V. is:  
Bayerisches Landesamt für Datenschutzaufsicht (BayLDA)  
Promenade 27  
91522 Ansbach
