

Archaeometric Approach to Production and Circulation of Hellenistic Fine Table Ware in Central Dalmatia, Croatia

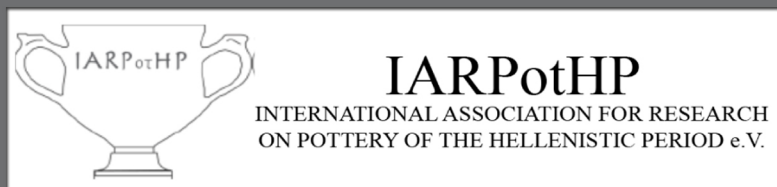

a webinar by
Dr. Maja Miše

Mon. May 3 at
5pm GMT

Extensive production and use, movements through cultural interaction and trade, and subtle morphological differences between workshops, present many challenges for the identification of regional Hellenistic fine pottery productions. The webinar will address these issues and discuss the methods and analytical techniques used in studies of provenance and technology on fine table ware from Central Dalmatia.

Presented by the IARPotHP
